Ring-inside engraving modul	460 300 0000
Stretching device	460 100 3000
Milling-motor	460 700 0000

Further accessories on request

**Engraving machine expandable through modular design:
The intelligent alternative to three separate   machines.**

By assembly of different modules the customer can compose their individual machine or the complete Modulgrav.

The modular design allows jewellers, watchmakers and engravers to meet today the requirements of tomorrow.

The base module consists of the base unit with mounted work plate and template rail plus engraving mouse and diamond holder complete with diamond.

Each required accessory module is mounted within seconds making the machine ready for the requested application. Turning buttons on the machine allow the precise adjustment of the engraving pressure of the diamond, or the depth adjustment of the cutter (no weights required).

Available modules: ring inside engraving, ring outside engraving, diamond flat engraving, cutter flat engraving (picture).

Further advantages are the adjustment of the height of letters and the letter stretching device.
Also available: a large range of supplementary equipment.
